Technical Reports

Technical Reports are research documents that are of sufficient importance to be preserved, but which for some reason are not appropriate for primary scientific publication. Inquiries concerning any particular Report should be directed to the issuing establishment.

Rapports Techniques

Les rapports techniques sont des documents de recherche qui revêtent une assez grande importance pour être conservés mais qui, pour une raison ou pour une autre, ne conviennent pas à une publication scientifique prioritaire. Pour toute demande de renseignements concernant un rapport particulier, il faut s'adresser au service responsable.

ABSTRACT

Westrheim, S. J., and B. M. Leaman. 1976. A selected bibliography of northeastern Pacific rockfishes (Sebastes and Sebastolobus) other than Sebastes alutus. Fish. Mar. Serv. Res. Dev. Tech. Rep. 659: 20 p.

A bibliography was compiled for rockfishes (Sebastes and Sebastolobus) other than Pacific ocean perch (Sebastes alutus) which is oriented to biology and distribution of commercially important species. Entries total 171; include literature available to April 1976; and are indexed by species and subject.

RÉSUMÉ

Westrheim, S. J., et B. M. Leaman. 1976. A selected bibliography of northeastern Pacific rockfishes (Sebastes and Sebastolobus) other than Sebastes alutus. Fish. Mar. Serv. Res. Dev. Tech. Rep. 659: 20 p.

Il s'agit d'une bibliographie relative aux sébastes (espèces Sebastes et Sebastolobus) autre que le sébastode (Sebastes alutus) et qui met l'accent sur la biologie et la répartition des espèces commercialement importantes. Comprenant 171 titres, la bibliographie est à jour au mois d'avril 1976, et est indexée par espèce et par sujet.

INTRODUCTION

Increasing commercial utilization of rockfishes, other than Pacific ocean perch (Sebastes alutus), in the Northeast Pacific Ocean has stimulated fisheries agencies in Canada and the United States to undertake scientific investigations of these little-known species. At the request of the Technical Sub-Committee of the International Groundfish Committee, a preliminary bibliography has been compiled in the format of Day and Forrester (1971). This compilation is oriented to the biology and distribution of commercially important rockfishes other than Pacific ocean perch. All references dealing exclusively with taxonomy have been omitted, except for the most recent taxonomic keys which were deemed useful in field studies. The bibliography includes entries from literature available up to April, 1976. Entries are indexed by major subject. Due to the classification of most of the species involved as "other rockfishes" in many of the references, any taxonomic index would necessarily be superficial. We decided to index by species only those entries wherein the species name was included in the title. The reader is directed to the Species associations heading for entries concerning multi-species studies. This latter heading includes entries describing groupings of species commonly occurring together in commercial or research vessel catches, but does not imply analyses of species assemblages.

Additions or corrections to this list are welcomed on a continuing basis.

SPECIES INDEX

Sebastes aleutianus

102

S. alutus

54-56, 135, 141, 153

S. auriculatus

71, 72

S. aurora
